

## HOBBY SCENE SCHEMATICS

In the Transistor Tester circuit shown in the March 1975 Hobby Scene, I believe that the npn and pnp LED's are transposed. *LED1* should be pnp, while *LED2* should be for npn indication.

The Mobile CB Power Supply featured in the April 1975 Hobby Scene column will not work as shown. The addition of a connection between the anode of the bottom diode and negative plate of the lower filter capacitor and the negative output terminal will make the power supply operational.
