

ONKYO® SERVICE MANUAL

Ref. No. 3678

042001

AUDIO VIDEO CONTROL RECEIVER MODEL TX-DS696

Black, Golden and Silver models

BMDD	120V AC, 60Hz
BMPP,SMPP BMPA,GMPA	230-240V AC, 50Hz
BMWT,GMWT GMWR	220-230V/120V AC, 50/60 Hz

AUDIO VIDEO CONTROL RECEIVER MODEL TX-DS595

Black, Golden and Silver models

BMDD	120V AC, 60Hz
BMPP,SMPP BMPA,GMPA	230-240V AC, 50Hz
BMWT,GMWT GMWR	220-230V/120V AC, 50/60 Hz
GMGT	220-230V AC,50 Hz

SAFETY-RELATED COMPONENT WARNING !!

COMPONENTS IDENTIFIED BY MARK  ON THE SCHEMATIC DIAGRAM AND IN THE PARTS LIST ARE CRITICAL FOR RISK OF FIRE AND ELECTRIC SHOCK. REPLACE THESE COMPONENTS WITH ONKYO PARTS WHOSE PART NUMBER APPEAR AS SHOWN IN THIS MANUAL.

MAKE LEAKAGE CURRENT OR RESISTANCE MEASUREMENTS TO DETERMINE THAT EXPOSED PARTS ARE ACCEPTABLY INSULATED FROM THE SUPPLY CIRCUIT BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

Mono:	76 dB
Stereo:	70 dB
Alternate Channel Attenuation:	55 dB
Selectivity:	50 dB (DIN)
AM Suppression Ratio:	50 dB
Total Harmonic Distortion	
Mono:	0.2%
Stereo:	0.3%
Frequency Response:	30 Hz to 15 kHz, \pm 1.0 dB
Stereo Separation:	45 dB at 1 kHz 30 dB at 100 Hz to 10 kHz

AM

Tuning Range	
USA & Canadian models:	530 to 1,710 kHz (10-kHz steps)
European & Australian models:	522 to 1,611 kHz (9-kHz steps)
Worldwide models:	531 to 1,602 kHz (9-kHz steps) 530 to 1,710 kHz (10-kHz steps)
Usable Sensitivity:	30 μ V
Image Rejection Ratio:	40 dB
IF Rejection Ratio:	40 dB
Signal-to-Noise Ratio:	40 dB
Total Harmonic Distortion:	0.7%

GENERAL

Power Supply:	AC 120 V, 60 Hz (USA & Canadian models) AC 230-240 V, 50 Hz (European & Australian models) AC 220-230 V, 50/60 Hz (some Asian models) AC 220-230 and 120 V switchable, 50/60 Hz (Worldwide models)
Power Consumption:	4.7 A 380 W
Dimensions (W \times H \times D):	435 \times 175 \times 431 mm 17-1/8" \times 6-7/8" \times 16-15/16"
Weight:	25.4 lbs. (USA & Canadian models) 12.5 kg (Other models)

REMOTE CONTROLLER

Transmitter:	Infrared
Signal range:	Approx. 5 meters, 16 ft.
Power supply:	Two "AA" batteries (1.5 V \times 2)

Specifications and features are subject to change without notice.

Power supply and voltage vary depending on the area in which the unit is purchased.

SPECIFICATIONS

AMPLIFIER SECTION

Continuous Average Power output (FTC)

All channels: 100 W per channel min. RMS at 8 Ω , 2 channels driven from 20 Hz to 20 kHz with no more than 0.08% total harmonic distortion.
125 W min. RMS at 6 Ω , 2 channels driven from 1 kHz with no more than 0.1% total harmonic distortion.

Continuous Power output (DIN) 130 W at 6 Ω

Maximum Power output (EIAJ) 160 W at 6 Ω

Dynamic Power Output (Stereo) 2×230 W at 3 Ω

GENERAL

Power Supply

AC 120 V, 60 Hz

(USA & Canadian models)

AC 230-240 V, 50 Hz

(European & Australian models)

AC 220-230 and 120 V switchable,

50/60 Hz (Worldwide models)

Power Consumption:

5.7 A

460 W

Dimensions (W \times H \times D):

435 \times 175 \times 431 mm

17-1/8" \times 6-7/8" \times 16-15/16"

Weight:

27.8 lbs. (USA & Canadian models)

13.5 kg (Other models)

REMOTE CONTROLLER

Transmitter:

Infrared

Signal range:

Approx. 5 meters, 16 ft.

Power supply:

Two "AA" batteries (1.5 V \times 2)

Specifications and features are subject to change without notice.

Power supply and voltage vary depending on the area in which the unit is purchased.

SERVICE PROCEDURES

1. Replacing the fuses

 This symbol located near the fuses indicates that the fuse used is fast operating type. For continued protection against fire hazard, replace with same type fuse. For fuse rating refer to the marking adjacent to the symbol.

 Ce symbole indique que le fusible utilisé est à rapide. Pour une protection permanente, n'utiliser que fusibles de même type. Ce dernier est la ou le present symbol est appse.

TX-DS696

F902	252076	3.15A-SE-EA<,Fuse <P/WT/WR/A/GT>
F903	252075	2.5A-SE-EA<,Fuse <P/A>
F95C1	252160	2.5A-UL/T-237,Fuse <D>
	252075	2.5A-SE-EA<,Fuse <P/A/WR/WT/GT>

Note. <D>: 120V model only
 <P>: European model only
 <WT>: Worldwide model only
 <WR>: Asian model only for 230V
 <GT>: 220-230V model only
 <A>: Australian model only

2. To initialize the unit

This device employs a microprocessor to perform various functions and operations. If interference generated by an external power supply, radio wave, or other electrical source results in accident which causes the specified operations and functions to operate abnormally

To perform a reset, please follow the procedure below.

1. Turn POWER to on
2. Press and hold down the PRESET MEMORY button, then press the STANDBY button.

After "clear" is displayed, the preset memory and each mode stored in the memory, such as surround, are initialized and will return to the factory setting

3. Disconnect Power supply cord.

3. Safety-check out

(Only U.S.A. model)

After correcting the original service problem, perform the following safety check before releasing the set to the customer. Connect the insulating-resistance tester between the plug of power supply cord and screw on the back panel.

Specifications: 3.3Mohm \pm 10% at 500V

4. Memory Preservation

This unit does not require memory preservation batteries. A built-in memory power back-up system preserves the contents of the memory during power failures and even when the unit is unplugged. The unit must be plugged in order to charge the back-up system.

The memory preservation period after the unit has been unplugged varies depending on climate and placement of the unit. On the average, memory contents are protected over a period of a few weeks after the last time the unit has been unplugged. This period is shorter when the unit is exposed to a highly humid climate.

5. Setting the AM tuning step frequency

(Worldwide models only)

The initializing setting is 9 kHz, and this needs only to be changed if you are using the unit in a 10-kHz region.

1. Press the SETUP button.
Turn the jog dial or press the \blacktriangle and \blacktriangledown cursor buttons on the remote controller to display "3. PREFERENCE."
2. Press the jog dial or ENTER button on the remote controller.
Turn the jog dial or press the \blacktriangledown cursor buttons on the remote controller to display "AM FREQ STEP?".
3. Press the jog dial or ENTER button on the remote controller.
The currently set frequency step appears.
4. Turn the jog dial or press the \blacktriangleleft and \blacktriangleright cursor buttons on the remote controller to set the frequency.
5. Press the RETURN button.
"AM FREQ STEP?" appears in the FL tube.
To exit the setup mode immediately, press the SETUP button.

6. Setting the Voltage selector (Worldwide models only)

Worldwide models are equipped with a voltage selector to conform with local power supplies. Be sure to set this switch to match the voltage of the power supply in your area before plugging in the unit.

Determine the proper voltage for your area: 220-230 V or 120 V.

2. If the preset voltage is not correct for your area, insert a screwdriver into the groove in the switch. Slide the switch all the way to the right (120 V) or to the left (220-230 V), whichever is appropriate.

7. Changing the AM band step

With the exception of the worldwide models a tuning step setup mode is not provided. When you change the band step, change the parts as shown below.

	To 10kHz	To 9kHz
F7780, F7781	330 ohm	Open
F7880, R7881	Open	2.2 kohm

PANEL VIEWS

Front panel

- ① **POWER switch**
Turns on and off the main power supply for the TX-DS595.
- ② **STANDBY indicator**
Lights when the TX-DS595 is in the standby state and flashes when a signal is received from the remote controller.
- ③ **STANDBY/ON button**
Press to turn on the TX-DS595 when in the standby state. Press again to return the TX-DS595 to the standby state.
- ④ **SPEAKERS A/B buttons**
Press these buttons to turn on and off speakers systems A and B.
- ⑤ **CH LEVEL button**
Press to select the channel whose level is to be adjusted.
- ⑥ **MASTER VOLUME dial**
The MASTER VOLUME dial is used to control the volume.
- ⑦ **PHONES jack**
To listen with headphones, plug a pair of headphones with a standard stereo plug into the PHONES jack on the TX-DS595 front panel. When you connect headphones, the unit will enter STEREO mode automatically and no sound will be heard from the speakers. If you have selected MULTICH INPUT, you will hear sound only from the FRONT L and R channels. Note that the volume level for the headphones is adjustable.
- ⑧ **AUDIO SELECTOR button**
This button is used to select the type of audio input signal. Each time pressed, the setting cycles from "AUTO" → "MULTI" → "ANALOG" and back.
- ⑨ **Input source buttons (DVD, VIDEO 1-3, TAPE, FM, AM, PHONO, and CD)**
These buttons are used to select the input source.
- ⑩ **BASS dial**
Boosts or cuts the bass response. Bass adjustment is effective only for the front speakers and headphones.
- ⑪ **TREBLE dial**
Boosts or cuts the treble response. Treble adjustment is effective only for the front speakers and headphones.
- ⑫ **Front display**
- ⑬ **Remote control sensor**
- ⑭ **SMART SCAN NAVIGATOR jog dial and indicators**
Used to make settings in the setup display, change listening mode settings, and more.
- ⑮ **SETUP button**
Press to enter and exit the setup mode.
- ⑯ **RETURN button**
Press to move up one level in the setup mode.
- ⑰ **DISPLAY button**
The DISPLAY button is used to display information about the current input source signal. Each time you press the display button, the screen changes to show you different information concerning the input signal.
- ⑱ **RT/PTY/TP (European models only) button**
This button is only available on European models. Use this button to help tune into the Radio Data System (RDS) for FM broadcasting. RDS was developed within the European Broadcasting Union (EBU) and is available in most European countries. Each time the button is pressed, the display changes from RT (radio text) to PTY (program type) to TP (traffic program) and then back to RT again.
- ⑲ **DIMMER (other than European models) button**
Press to set the brightness of the front display. There are 3 settings available: normal, dark, and very dark.
- ⑲ **FM MODE button**
When there is too much noise in the stereo reception of an FM broadcast, press to turn off the FM MUTE function.
- ⑳ **PRESET MEMORY button**
This button is used to assign the radio station that is currently tuned in to a preset channel or delete a previously preset station.
- ㉑ **TUNING </> buttons**
Use these buttons to change the tuner frequency. The tuner frequency is displayed in the front display and it can be changed in 50 kHz increments for FM and 10 kHz (or 9 kHz) increments for AM. When FM is selected, you can hold down one of the tuning buttons and then release it to activate the auto-search feature. It will search for a station in the direction of the button you pressed and stop when it tunes into one.
- ㉒ **PRESET </> buttons**
When AM or FM is selected as the input source, press one of these buttons to jump to a radio station that you preset using the PRESET MEMORY button. Pressing the right button moves from the most recently preset station to older ones, and pressing the left button moves in the reverse order.

REMOTE CONTROLLER

Selects an input source. Same as the input selector buttons on front panel of the TX-DS595. The input source for each button is given here: DVD/DVD, CD/CD, V1/VIDEO1, V2/VIDEO2, V3/VIDEO3, V4/Not used with the TX-DS595, T1/TAPE, T2/Not used with the TX-DS595, TUN/FM/AM, PHILIPION.

13 **Numeric key/Listening mode selector/SP A, B/ Re-EQ/DISPLAY/DIMMER buttons**
 1 to 9, +10, --, 0: For entering the number of a track.
STEREO, DIRECT, DSP \leftarrow **SURR, A, ST**: You can select a listening mode.

STEREO: Changes the listening mode directly to the Stereo listening mode. If pressed, the listening mode for the selected input source set in the Listening Mode Preset is also changed to the Stereo listening mode.
SURR (Surround): Changes the listening mode to the surround mode for the current input signal (e.g., Dolby Pro Logic II, Dolby Digital, or DTS). If pressed, the listening mode for the selected input source set in the Listening Mode Preset is also changed to the Surround listening mode.
 For Dolby Pro Logic II, this button also changes the mode between Dolby Pro Logic II Movie and Dolby Pro Logic II Music.

DIRECT: Changes the listening mode directly to the Direct listening mode. If pressed, the listening mode for the selected input source set in the Listening Mode Preset is also changed to the Direct listening mode.
A, ST (All Channel Stereo): Changes the listening mode directly to the Stereo listening mode. If pressed, the listening mode for the selected input source set in the Listening Mode Preset is also changed to the Direct listening mode.

Re-EQ: Depending on the listening mode, you can turn the cinema re-equalization function on or off.
Re-EQ (re-equalization) takes the edginess or "brightness" out of your home cinema sound to compensate for the fact that sound mixed for theaters may sound too bright when played back through speakers in the home environment.
On: Select to turn on the re-equalization filter.
Off: Select to turn off the re-equalization filter.

Note: The Re-EQ function is effective on the Dolby Pro Logic II Surround and Dolby Digital Surround.
SP A, SP B: For turning on and off speakers systems A and B.
DISPLAY: For changing the display in the front display.
DIMMER: Adjusts the display brightness.
 There are three settings available: normal, dark and very dark.

14 **MODE MACRO button**
 For executing and programming the Macro function.
15 **SETUP button**
 Press to enter and exit the setup mode.
16 **ENTER/cursor button**
 For selecting and entering settings in the setup mode.

17 **VOL +/- button**
 For adjusting the volume.
18 **TEST/MENU button**
TEST: Outputs a test tone for setting speaker levels. Use this button in conjunction with the LEVEL \blacktriangle / \blacktriangledown and CH SEL buttons to calibrate the speakers levels.
19 **Press the TEST button.**
 A test sound (pink noise) will be heard from the left front speaker. At this point, it is not necessary to adjust the volume of the test sound.

20 **Repeat the procedure in step 2 and 3 until the volume of the test sound from all speakers is the same level.**
 Each time you press the CH SEL button, the test sound will be heard from a different speaker. The speaker order for calibration is front left \rightarrow center \rightarrow front right \rightarrow surround right \rightarrow surround left \rightarrow subwoofer.
5. Press the TEST button to exit the setting.
 For a more detailed explanation of how to calibrate the speaker levels, see page 20.
MENU: When in the DVD mode, this button displays the DVD menu.
19 **MUTING button**
 Activates the mute function.
20 **ZONE 2/SEARCH/CENTER button**
ZONE 2: Not used with the TX-DS595.
SEARCH: When in the DVD mode, for finding the specific section on a disc where you want to start playback.
ENTER: When in the MD mode, for confirming the selection.

17 **VOL +/- button**
 For adjusting the volume.
18 **TEST/MENU button**
TEST: Outputs a test tone for setting speaker levels. Use this button in conjunction with the LEVEL \blacktriangle / \blacktriangledown and CH SEL buttons to calibrate the speakers levels.
19 **Press the TEST button.**
 A test sound (pink noise) will be heard from the left front speaker. At this point, it is not necessary to adjust the volume of the test sound.
20 **Repeat the procedure in step 2 and 3 until the volume of the test sound from all speakers is the same level.**
 Each time you press the CH SEL button, the test sound will be heard from a different speaker. The speaker order for calibration is front left \rightarrow center \rightarrow front right \rightarrow surround right \rightarrow surround left \rightarrow subwoofer.
5. Press the TEST button to exit the setting.
 For a more detailed explanation of how to calibrate the speaker levels, see page 20.
MENU: When in the DVD mode, this button displays the DVD menu.
19 **MUTING button**
 Activates the mute function.

 For adjusting the volume.
18 **TEST/MENU button**
TEST: Outputs a test tone for setting speaker levels. Use this button in conjunction with the LEVEL \blacktriangle / \blacktriangledown and CH SEL buttons to calibrate the speakers levels.
19 **Press the TEST button.**
 A test sound (pink noise) will be heard from the left front speaker. At this point, it is not necessary to adjust the volume of the test sound.
20 **Repeat the procedure in step 2 and 3 until the volume of the test sound from all speakers is the same level.**
 Each time you press the CH SEL button, the test sound will be heard from a different speaker. The speaker order for calibration is front left \rightarrow center \rightarrow front right \rightarrow surround right \rightarrow surround left \rightarrow subwoofer.
5. Press the TEST button to exit the setting.
 For a more detailed explanation of how to calibrate the speaker levels, see page 20.
MENU: When in the DVD mode, this button displays the DVD menu.
19 **MUTING button**
 Activates the mute function.
20 **ZONE 2/SEARCH/CENTER button**
ZONE 2: Not used with the TX-DS595.
SEARCH: When in the DVD mode, for finding the specific section on a disc where you want to start playback.
ENTER: When in the MD mode, for confirming the selection.

17 **VOL +/- button**
 For adjusting the volume.
18 **TEST/MENU button**
TEST: Outputs a test tone for setting speaker levels. Use this button in conjunction with the LEVEL \blacktriangle / \blacktriangledown and CH SEL buttons to calibrate the speakers levels.
19 **Press the TEST button.**
 A test sound (pink noise) will be heard from the left front speaker. At this point, it is not necessary to adjust the volume of the test sound.
20 **Repeat the procedure in step 2 and 3 until the volume of the test sound from all speakers is the same level.**
 Each time you press the CH SEL button, the test sound will be heard from a different speaker. The speaker order for calibration is front left \rightarrow center \rightarrow front right \rightarrow surround right \rightarrow surround left \rightarrow subwoofer.
5. Press the TEST button to exit the setting.
 For a more detailed explanation of how to calibrate the speaker levels, see page 20.
MENU: When in the DVD mode, this button displays the DVD menu.
19 **MUTING button**
 Activates the mute function.
20 **ZONE 2/SEARCH/CENTER button**
ZONE 2: Not used with the TX-DS595.
SEARCH: When in the DVD mode, for finding the specific section on a disc where you want to start playback.
ENTER: When in the MD mode, for confirming the selection.

17 **VOL +/- button**
 For adjusting the volume.
18 **TEST/MENU button**

PANEL VIEWS

Front panel

- 1 **POWER switch**
Turns on and off the main power supply for the TX-DS696.
- 2 **STANDBY indicator**
Lights when the TX-DS696 is in the standby state and flashes when a signal is received from the remote controller.
- 3 **STANDBY/ON button**
Press to turn on the TX-DS696 when in the standby state. Press again to return the TX-DS696 to the standby state.
- 4 **REC OUT button**
Press the REC OUT button to output the audio signals to a recording component for recording purposes.
- 5 **ZONE 2 button and indicator**
Press the ZONE 2 button to enjoy the output from the TX-DS696 in a different room, which is referred to as a remote zone (Zone 2). ZONE 2 indicator lights when a signal is output to the remote zone (Zone 2). When the ZONE 2 indicator is off, then either output to the remote zone is turned off or Rec Out is selected.
- 6 **ZONE 2 LEVEL button**
Press to enter the mode for adjusting the volume in the remote zone (Zone 2).
- 7 **CH LEVEL button**
Press to select the channel whose level is to be adjusted.
- 8 **MASTER VOLUME dial**
The MASTER VOLUME dial is used to control the volume for the main zone. The volume for the remote zone (Zone 2) is independent.
- 9 **PHONES jack**
This is a standard stereo jack for connecting stereo headphones.
- 10 **AUDIO SELECTOR button**
This button is used to select the type of audio input signal. Each time pressed, the setting cycles from "AUTO" → "Multich" → "Analog" and back.
- 11 **Input source buttons (DVD, VIDEO 1-4, TAPE, FM, AM, PHONO, and CD)**
These buttons are used to select the input source for the main zone. To select the input source for the remote zone (Zone 2) or recording out (Rec Out), first press the Zone 2 or Rec Out button, and then the desired input source button.
- 12 **BASS dial**
Boosts or cuts the bass response. Bass adjustment is effective only for the front speakers and headphones.
- 13 **TREBLE dial**
Boosts or cuts the treble response. Treble adjustment is effective only for the front speakers and headphones.
- 14 **Front display**
- 15 **Multi function display**
- 16 **Zone 2 indicator**
- 17 **Tuning indicators**
- 18 **Listening mode or digital input format indicators**
- 19 **Sleep indicator**
- 20 **Rec out indicator**
- 21 **Zone 2 indicator**
- 22 **Zone 2 indicator**
- 23 **Zone 2 indicator**
- 24 **Zone 2 indicator**
- 15 **Remote control sensor**
- 16 **SMART SCAN NAVIGATOR jog dial and indicators**
Used to make settings in the Setup menu, change listening mode settings, and more.
- 17 **SETUP button**
Press to bring up the Setup menu. The OSD menu will appear on the TV monitor as well as the front display on the TX-DS696.
- 18 **RETURN button**
Press to exit the Main menu level or go back one level up.
- 19 **DISPLAY button**
The DISPLAY button is used to display information about the current input source signal. Each time you press the display button, the screen changes to show you different information concerning the input signal.
- 20 **RT/PTY/TP (European models only) button**
This button is only available on European models. Use this button to help tune into the Radio Data System (RDS) for FM broadcasting. RDS was developed within the European Broadcasting Union (EBU) and is available in most European countries. Each time the button is pressed, the display changes from RT (radio text) to PTY (program type) to TP (traffic program) and then back to RT again.
- 20 **DIMMER (other than European models) button**
Press to set the brightness of the front display. There are 3 settings available: normal, dark, and very dark.
- 21 **FM MODE button**
If you are listening to an FM radio station in stereo and the sound cuts out or there is a great deal of noise, switch from STEREO to MONO. Each time this button is pressed, the AUTO indication flashes and the stereo mode changes from AUTO to MONO and vice versa. This button also turns on and off the FM MUTE.
- 22 **PRESET MEMORY button**
This button is used to assign the radio station that is currently tuned in to a preset channel or delete a previously preset station.
- 23 **TUNING </> buttons**
Use these buttons to change the tuner frequency. The tuner frequency is displayed in the front display and it can be changed in 50 kHz increments for FM and 10 kHz (or 9 kHz) increments for AM.
When FM is selected, you can hold down one of the tuning buttons and then release it to activate the auto-search feature. It will search for a station in the direction of the button you pressed and stop when it tunes into one.
- 24 **PRESET </> buttons**
When AM or FM is selected as the input source, press one of these buttons to jump to a radio station that you preset using the PRESET MEMORY button. Pressing the right button moves from the most recently preset station to older ones, and pressing the left button moves in the reverse order.

Front panel display

REMOTE CONTROLLER

1 SEND/LEARN indicator

This indicator acts as a guide when commands are programmed into or sent by the remote controller. It also warns the user when an error is made or battery power is low.

2 ON/STDBY button

ON: Turns on the TX-DS696.

STDBY: Places the TX-DS696 in the standby state. Be aware that pressing the STDBY button only places the TX-DS696 in standby and does not turn the power completely off.

3 SLEEP button

Sets the sleep function. The SLEEP button enables you to set the TX-DS696 to turn off automatically after a specified time period.

4 DIRECT MACRO button

For executing and programming the Direct Macro function.

5 MODE buttons and indicators

For selecting the component to be operated by the remote controller. When a MODE button is pressed, it will light green for 8 seconds. The selected MODE button will also light whenever any other operation button is pressed to tell you which mode the remote controller is in.

6 RETURN button

For entering the selected setting and returning to the previous menu.

7 CH/DISC +/- button

When in the RCVR mode, for selecting a tuner preset channel. For selecting the disc to be played back for components with disc changers when in the DVD or CD modes.

8 CH SEL/TOP MENU button

CH SEL: For selecting the speaker for level adjustment when in the RCVR mode. Used together with the LEVEL Δ/V buttons.

TOP MENU: When in the DVD mode, for displaying the menu screen(s) recorded on DVD media.

9 AUDIO/TV/VCR button

AUDIO/A: For selecting the audio input signal. The setting changes from "AUTO" to "Multich" to "Analog" and back each time this button is pressed.

TV/VCR: Must be preprogrammed for use in the TV and VCR modes.

10 LEVEL /ANGLE and LEVEL Δ/SUBTITLE buttons

LEVEL /A: Select the speaker whose volume is to be adjusted using the CH SEL button and adjust the volume using the LEVEL Δ/V buttons in the RCVR mode.

ANGLE: When in the DVD mode, for selecting a camera angle when a DVD-Video is recorded with multiple angle playback. [48]

SUBTITLE: When in the DVD mode, for selecting one of the subtitle languages recorded on a DVD-Video.

11 CD/TAPE/DVD/MD operation buttons

For operating Onkyo components connected to the TX-DS696.

12 INPUT SELECTOR buttons

Selects an input source.

Same as the input selector buttons on front panel of the TX-DS696. The input source for each button is given here: DVD/DVD, CD/CD, V1/VIDEO1, V2/VIDEO2, V3/VIDEO3, V4/VIDEO4, T1/TAPE, T2. Not used with the TX-DS696, TUN/FM/AM, PH/PHONO.

13 Numeric key/Listening mode selector/SP A, B/ Re-EQ/DISPLAY/DIMMER buttons

1 to 9, +10, -/--, 0: For entering the number of a track.

STEREO, DIRECT, DSP Δ/F, SURR, A-ST: You can select a listening mode.

Re-EQ: Depending on the listening mode, you can turn the cinema re-equalization function on or off.

SP A, SP B: Not used with the TX-DS696.

DISPLAY: For changing the display in the front display.

DIMMER: Adjusts the display brightness.

There are three settings available: normal, dark and very dark.

14 LIGHT button

For illuminating the buttons of the remote controller.

This is button is useful when using the remote controller in dark locations. When pressed, the buttons on the remote controller light green.

The button for the mode currently selected lights brighter than the rest.

15 MODE MACRO button

For executing and programming the Macro function.

16 SETUP button

For displaying and quitting the Setup menu.

17 ENTER/cursor button

When selecting items in the Setup menu, press the upper and lower portions to select item, press the right and left portions to select parameter values or modes, and press ENTER to select item.

18 VOL Δ/V button

For adjusting the volume.

19 TEST/MENU button

TEST: Outputs a test tone for setting speaker levels.

Use this button in conjunction with the LEVEL Δ/V and CH SEL buttons to calibrate the speakers levels without entering the Setup menu. When TEST button is pressed, the test noise (pink noise) is output. Use the LEVEL Δ/V buttons to increase or decrease the sound level. Use the CH SEL button to change from speaker to speaker. For a more detailed explanation of how to calibrate the speaker levels.

MENU: When in the DVD mode, this button displays the DVD menu.

20 MUTING/M button

Activates the mute function.

21 ZONE 2/SEARCH/ENTER button

ZONE 2: When in the RCVR mode, press this button to perform operations on the remote zone (Zone 2).

SEARCH: When in the DVD mode, for finding the specific section on a disc where you want to start playback.

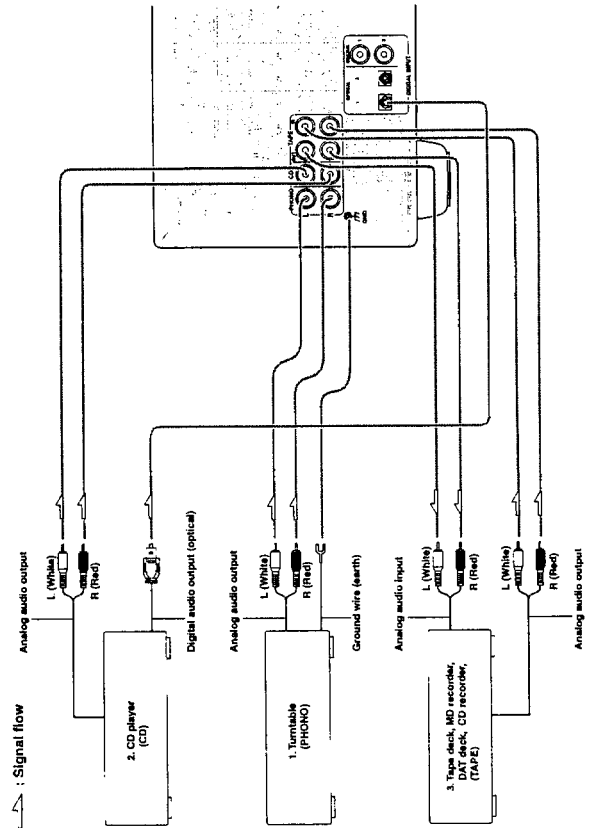

ENTER: When in the MD mode, for confirming the selection.

MAIN MICROPROCESSOR

MAIN MICROPROCESSOR-TERMINAL DESCRIPTION

Pin No.	Symbol	I/O	Description	Pin No.	Symbol	I/O	Description
3	AMUT	O	Audio muting output pin.	50	RI.FD	O	Right direction LED control output pin of SSC.
4	VB	O	Output B pin to control video signal.	51	~SBMRST	O	Reset signal output pin to sub microprocessor.
5	VA	O	Output A pin to control video signal.	52	SBMCLK	O	Clock signal output pin to transmit to the sub microprocessor.
6	EVDD		Power supply pin. Connect to +5V.	53	SBMDO	O	Data signal output pin to transmit to the sub microprocessor.
7	EVSS		Ground pin.	54	SBMDI	I	Data signal input pin to transmit from the sub microprocessor.
8	GSW	O	Gain control signal output pin for subwoofer.	55	BVDD		Power supply pin. Connect to +5V.
9	GF'S	O	Gain control output signal pin to front, surround, and center channels.	56	BVSS		Ground pin.
10	~CODECPD	O	Power down output pin to Codec IC.	57	SBMREDDY	I	Read signal input pin to transmit from the sub microprocessor.
11	INTREQ	I/O	Interrupter and abort signal input/output pin of DSP IC.	58	IID	I	Detection pin when insert the headphones.
12	DSPDI	I	Serial data input pin from DIR and DSP ICs.	59	Z2LED	O	Zone 2 LED control output pin.
13	DSPDO	O	Serial data output pin from DIR and DSP ICs.	61	HPMUT	O	Muting output pin to the headphone circuit.
14	DSPSCK	O	Serial clock output pin to DIR and DSP ICs.	64	TMUT	O	Muting output pin to the tuner block.
15	DSPCS	O	Chip select output pin to DSP IC.	66	FDA	O	Data signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
16	CSROM/~SRAM	O	"Change-over pin of RAM and ROM, ROM at H."	67	FCL	O	Clock signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
17	A15	O	ROM address 15	68	FSTB	O	Strobe signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
18	VPP			69	RDSSIG/12VB	I/O	Quality check input pin of RDS demodulator signal.
19	A16	O	ROM address 16	70	RSDSA/12VA	I/O	Data input pin from RDS decoder.
20	A17	O	ROM address 17	71	AVDD		Power supply pin. Connect to +5V.
21	~DSPRST	O	Reset signal output pin to DSP IC.	72	AVSS		Ground pin.
22	ERF	I	Error flag input pin.	73	AVREF		Reference voltage input pin.
23	AUTO	O	Auto detection input pin of DIR IC.	74	VOLH	I	Voltage detection input pin of speaker terminal.
24	DIRCS	O	Chip select output pin to DIR IC.	75	~ST	I	Stereo broadcast detection input pin.
25	~DIRPD	O	Power down signal output pin to DIR IC.	76	~SD	I	Station input pin.
31	~RESET	I	System reset input terminal.	77	12VTRGEN	I	Initializing input terminal for 12V trigger.
32	XT1		Oscillator connection pin of sub system. Not used.	78	RDSEN	I	Initializing input terminal for RDS broadcast.
33	XT2		Not used.	79	PLAEN	I	Initializing input terminal for PAL/NTSC.
34	REGC			80	AREA1	I	Initializing input terminal for broadcast area.
35	X2		Ceramic oscillator connection pins.	81	AREA2	I	Initializing input terminal for broadcast area.
36	X1		Connect the 20MHz ceramic oscillator between X1 and X2 pins.	88	~POFF	I	Power failure detection input pin.
37	VSS		Power supply pin. Connect to ground pin.	89	RDSSCK	I	Clock signal input pin from RDS decoder.
38	VDD		Power supply pin. Connect to +5V.	90	PLLSTB	O	Chip enable signal output pin to PLL IC.
39	CLKOUT		Not used.	91	PLLDA	O	Data signal output pin to PLL IC.
41	SPB	O	Speaker relay B control signal output pin.	92	PLLCL	O	Clock signal output pin to PLL IC.
42	SECIH	O	Amplifier gain control output pin.	93	VLLSTB	O	Strobe signal output pin to electrical volume IC.
43	SPCS	O	Speaker relay control output pin of center and surround channels.	94	SI	I	Signal input pin to write the program.
44	SPA	O	Speaker relay A control signal output pin.	95	SO	O	Signal output pin to write the program.
45	POWER	O	Power relay control output pin.	96	SCL	O	Clock signal output pin to write the program.
46	PROTECT	I	Protection circuit detection input pin.	99	VOLCL/HS	O	Clock signal output pin to the electrical volume IC.
47	UPLED	O	Up direction LED control output pin of SSC.	100	VOLDA	O	Data signal output pin to the electrical volume IC.
48	DNLED	O	Down direction LED control output pin of SSC.				
49	LEED	O	Left direction LED control output pin of SSC.

SUB MICROPROCESSOR TERMINAL DESCRIPTION

Pin No.	Symbol	I/O	Description	Pin No.	Symbol	I/O	Description
1	VDD		Power supply terminal. Connect to 5V.	40	P23	O	Segment output terminal of P23.
2	VSS		Ground terminal.	41	P22	O	Segment output terminal of P22.
3	X1		Ceramic oscillator connection terminals for main system.	42	P21	O	Segment output terminal of P21.
4	X2		Connect the 5MHz ceramic oscillator between #3 and #4.	43	P20	O	Segment output terminal of P20.
5	IC/VPP		Power supply terminal for flash memory IC.	44	P19	O	Segment output terminal of P19.
6	~RESET	I	System reset signal input terminal.	45	P18	O	Segment output terminal of P18.
7	SUBCL/SCK	I	Clock input terminal to transmit from main microprocessor or to write the program.	46	P17	O	Segment output terminal of P17.
8	SUBDO/SDI	I	Data input terminal to transmit from main microprocessor or to write the program.	47	P16	O	Segment output terminal of P16.
9	SUBDI/SDD	O	Data output terminal to transmit to main microprocessor or to write the program.	48	P15	O	Segment output terminal of P15.
10	SUBLDY	O	Data ready output terminal to transmit to the main microprocessor.	49	P14	O	Segment output terminal of P14.
11	VBJ	I	Pulse input terminal from the rotary encoder of volume.	50	P13	O	Segment output terminal of P13.
12	VAJ	I	Pulse input terminal from the rotary encoder of volume.	51	P12	O	Segment output terminal of P12.
13	SSCBJ	I	Pulse input terminal from the rotary encoder of SSC.	52	P11	O	Segment output terminal of P11.
14	SSCAJ	I	Pulse input terminal from the rotary encoder of SSC.	53	P10	O	Segment output terminal of P10.
15	~IRIN	I	Signal input terminal to remote controller.	54	P9	O	Segment output terminal of P9.
16	~IRF	I	Signal input terminal to remote controller.	55	P8	O	Segment output terminal of P8.
17	STBYLED	O	Standby LED control output terminal.	56	P7	O	Segment output terminal of P7.
18	AVSS	O	Ground terminal for A/D converter.	57	P6	O	Segment output terminal of P6.
19	K3	I	Operation key connection terminal.	58	P5	O	Segment output terminal of P5.
20	K2	I	Operation key connection terminal.	59	VDD2		Power supply terminal. Apply +5V.
21	K1	I	Operation key connection terminal.	60	VLOAD		Negative power supply terminal of FL controller.
22	K0	I	Operation key connection terminal.	61	P4	O	Segment output terminal of P4.
23	VSS0		Ground terminal	62	P3	O	Segment output terminal of P3.
24	AVDD		Power supply terminal for A/D converter.	63	P2	O	Segment output terminal of P2.
25	VDDD		Power supply terminal. Apply +5V.	64	P1	O	Segment output terminal of P1.
26	~SYSIN	I	System code input terminal.	65	I6G	O	Grid output terminal of I6G.
27	~SYSOUT	O	System code output terminal.	66	I5G	O	Grid output terminal of I5G.
28	P35	O	Segment output terminal of P35.	67	I4G	O	Grid output terminal of I4G.
29	P34	O	Segment output terminal of P34.	68	I3G	O	Grid output terminal of I3G.
30	P33	O	Segment output terminal of P33.	69	I2G	O	Grid output terminal of I2G.
31	P32	O	Segment output terminal of P32.	70	I1G	O	Grid output terminal of I1G.
32	P31	O	Segment output terminal of P31.	71	I0G	O	Grid output terminal of I0G.
33	P30	O	Segment output terminal of P30.	72	9G	O	Grid output terminal of 9G.
34	P29	O	Segment output terminal of P29.	73	8G	O	Grid output terminal of 8G.
35	P28	O	Segment output terminal of P28.	74	7G	O	Grid output terminal of 7G.
36	P27	O	Segment output terminal of P27.	75	6G	O	Grid output terminal of 6G.
37	P26	O	Segment output terminal of P26.	76	5G	O	Grid output terminal of 5G.
38	P25	O	Segment output terminal of P25.	77	4G	O	Grid output terminal of 4G.
39	P24	O	Segment output terminal of P24.	78	3G	O	Grid output terminal of 3G.
				79	2G	O	Grid output terminal of 2G.
				80	1G	O	Grid output terminal of 1G.

MAIN MICROPROCESSOR

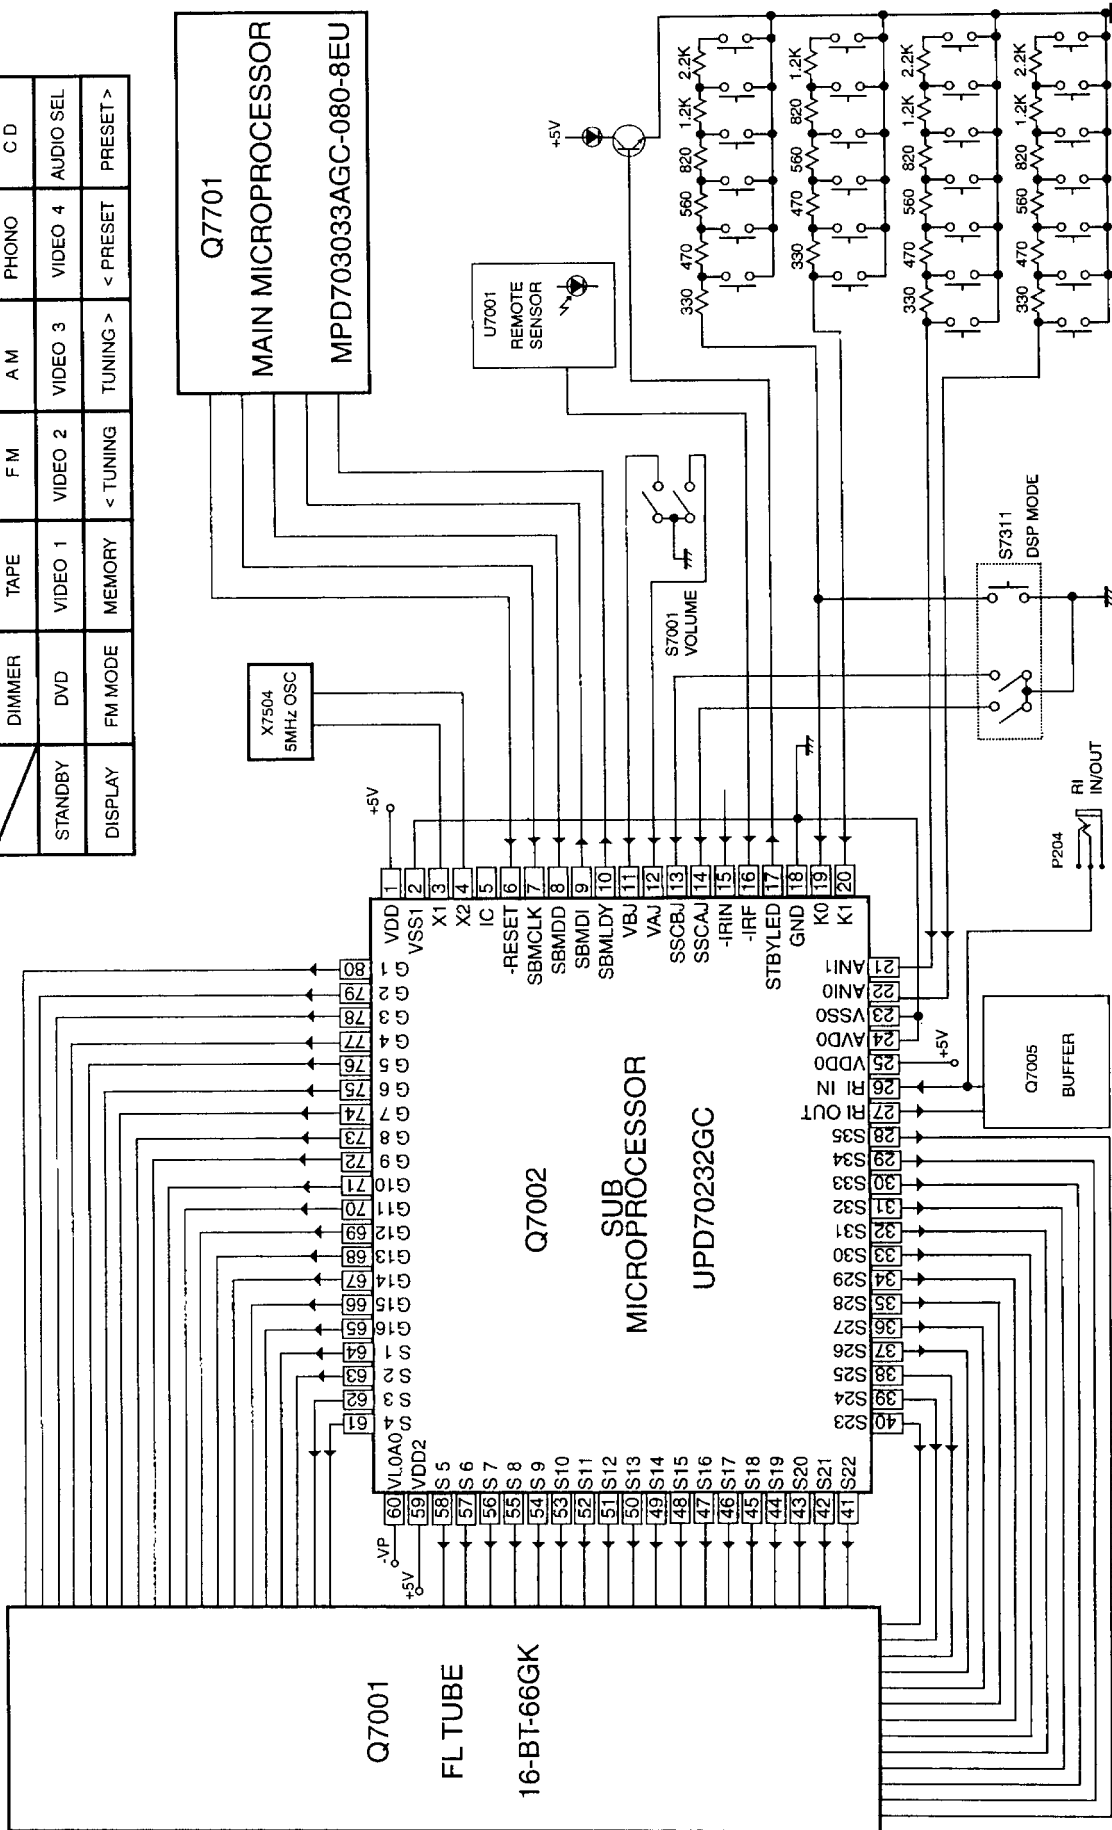

MAIN MICROPROCESSOR TERMINAL DESCRIPTION

Pin No.	Symbol	I/O	Description	Pin No.	Symbol	I/O	Description
1	DSPDA	O	Serial data output pin to DSP IC.	55	BVDD		Power supply pin. Connect to +5V.
2	DSPCL	O	Serial clock output pin to DSP IC.	56	BVSS		Ground pin.
3	AMUT	O	Audio muting output pin.	57	SBMREDY	I	Red signal input pin to transmit from the sub microprocessor.
4	VDDA	O	Data signal output pin to analog switch for video switch control.	58	HD	I	Detection pin when insert the headphones.
5	VDCLK	O	Clock signal output pin to analog switch for video switch control.	59	Z2LED	O	Zone 2 LED control output pin.
6	EVDD		Power supply pin. Connect to +5V.	61	HPMUT	O	Muting output pin to the headphone circuit.
7	EVSS		Ground pin.	62	VMUT	O	Muting output pin to the video circuit.
8	GSW	O	Gain control signal output pin for subwoofer.	63	Z2MUT	O	Muting output pin to the zone 2 circuit.
9	GFS	O	Gain control output signal pin to front, surround, and center channels.	64	TMUT	O	Muting output pin to the tuner block.
10	~CODECPD	O	Power down output pin to Codec IC.	65	OSDSTB	O	Chip select signal output pin to OSD IC.
11	INTREQ	I/O	Interrupter and abort signal input/output pin of DSP IC.	66	FDA	O	Data signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
12	DSPDI	I	Serial data input pin from DIR and DSP ICs.	67	FCL	O	Clock signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
13	DSPDO	O	Serial data output pin from DIR and DSP ICs.	68	FSTB	O	Strobe signal output pin to Selector, Configuration, Multi channel, and Multi source control ICs.
14	DSPSCK	O	Serial clock output pin to DIR and DSP ICs.	69	RDSSIG/12VB	I/O	Quality check input pin of RDS demodulator signal.
15	DSPCS	O	Chip select output pin to DSP IC.	70	RSDSA/12VA	I/O	Data input pin from RDS decoder.
18	VPP			71	AVDD		Power supply pin. Connect to +5V.
21	~DSPRST	O	Reset signal output pin to DSP IC.	72	AVSS		Ground pin.
22	ERF	I	Error flag input pin.	73	AVREF		Reference voltage input pin.
23	AUTO	O	Auto detection input pin of DIR IC.	74	VOLH	I	Voltage detection input pin of speaker terminal.
24	DIRCS	O	Chip select output pin to DIR IC.	75	~ST	I	Stereo broadcast detection input pin.
25	~DIRPD	O	Power down signal output pin to DIR IC.	76	~SD	I	Station input pin.
26	~232CTS	I	Transmission judge input pin of RS232C signal.	77	12VTRGEN	I	Initializing input terminal for 12V trigger.
27	~232RTS	O	Communication request signal output pin of RS232C signal.	78	RDSEN	I	Initializing input terminal for RDS broadcast.
31	~RESET	I	System reset input terminal.	79	PLAEN	I	Initializing input terminal for PAL/NTSC.
32	XT1		Oscillator connection pin of sub system. Not used.	80	AREA1	I	Initializing input terminal for broadcast area.
33	XT2		Not used.	81	AREA2	I	Initializing input terminal for broadcast area.
34	REGC			82	SDET	I	S video signal detection input pin.
35	X2		Ceramic oscillator connection pins.	83	SYNC	I	Judge input pin for external synchronizing of OSD.
36	X1		Connect the 20MHz ceramic oscillator between X1 and X2 pins.	86	VDSTB	O	Strobe output pin of analog switch for video controller.
37	VSS		Power supply pin. Connect to ground pin.	87	~VSYNC	I	Vertical synchronizing signal input pin.
38	VDD		Power supply pin. Connect to +5V.	88	~POFF	I	Power failure detection input pin.
39	CLKOUT		Not used.	89	RDSSCK	I	Clock signal input pin from RDS decoder.
41	SPZ2	O	Speaker relay control signal output pin for Zone 2.	90	PLLSTB	O	Chip enable signal output pin to PLL IC.
42	SECIH	O	Amplifier gain control output pin.	91	PLLDA	O	Data signal output pin to PLL IC.
43	SPCS	O	Speaker relay control output pin of center and surround channels.	92	PLLCL	O	Clock signal output pin to PLL IC.
44	SPF	O	Speaker relay control output pin of front channel.	93	VLSTB	O	Strobe signal output pin to electrical volume IC.
45	POWER	O	Power relay control output pin.	94	SI	I	Signal input pin to write the program.
46	PROTECT	I	Protection circuit detection input pin.	95	SO	O	Signal output pin to write the program.
47	UPLED	O	Up direction LED control output pin of SSC.	96	SCL	O	Clock signal output pin to write the program.
48	DNLED	O	Down direction LED control output pin of SSC.	97	232RXD	I	Transmission judge input pin of RS232C signal.
49	LEED	O	Left direction LED control output pin of SSC.	98	232TXD	O	Communication request signal output pin of RS232C signal.
50	RLED	O	Right direction LED control output pin of SSC.	99	VOLCL/HS	O	Clock signal output pin to the electrical volume IC.
51	~SBMRST	O	Reset signal output pin to sub microprocessor.	100	VOLDA	O	Data signal output pin to the electrical volume IC.
52	SBMCLK	O	Clock signal output pin to transmit to the sub microprocessor.				
53	SBMDO	O	Data signal output pin to transmit to the sub microprocessor.				
54	SBMDI	I	Data signal input pin to transmit from the sub microprocessor.

ABOUT DEBUG MODE

TX-DS595

TX-DS696

1. How to enter the debug mode

Press and hold down the AUDIO SEL button, then press the STANDBY/ON button to display "DEBUG MODE IN". After 5 second the unit enters the DEBUG mode. When there is the error that can judge by the microprocessor, the error message is displayed for 3 seconds.

DSPREAD ERROR: Problem of interface between DSP and microprocessor.

DSPLOCK ERROR: Problem of lock of DSP IC.

On all occasions the microprocessor resets DSP, and DSP is restarted.

2. How to investigate the unit by the debug mode

Apply the signal that the trouble occurs, and compare with the example of display or the normal unit. If there is difference on the display, you are able to check the rejection by the explanation below. If there is not difference, the input signal comes to DSP IC and the format of signal is recognized. Check the signal from the DSP output to the speaker output.

3. Explanation of Display

1. DIR ERROR: Check of digital signal of DIR IC (AK4112).

L:There is the digital signal. H:No digital signal.

When apply the digital signal, the display is "L".

Check the circuit from digital input to DIR IC and the connection between ERF (#18) of DIR and microprocessor.

2. DIR STATUS 1: It displays the status of Addr03H that AK4112 reads from the digital signal. It shows the sampling frequency, and pre emphasis etc. When the display is difference to the table below, check the signals of DSPCL and DSPDA to confirm the communication between the microprocessor and CDTO/SCDO(#28) of AK4112.

3. DIR STATUS 2: It displays the status of Addr0DH that AK4112 reads from the digital signal. It shows the constants of input signal (DD,DTS,MPEG etc.). When the display is difference to the table below, check the signals of DSPCL and DSPDA to confirm the communication between the microprocessor and CDTO/SCDO(#28) of AK4112.

4. DIR analog/digital judgment

It displays the result of judgment about input signal by the microprocessor. D:Digital A:Analog

5-7. Addr15 -17 :These displays show the port condition of the flash memory control. "L" except Japanese model.

	DIR ERROR	DIR STATUS1	DIR STATUS2	ANA/DIG	ADDR15	ADDR16	ADDR17	Judgment	DECODE
DOLBY DIGITAL	L	34 or B4	01	D	L	L	H	01	1
MPEG AAC *1	L	34 or B4	07	D	L	H	L	07	1
DTS DVD	L	34 or B4	0B	D	H	L	L	0B	1
PCM 48K	L	04	**	D	L	L	L	23	1
PCM 96K	L	03 or 05	**	D	L	L	H	23	1
ANALOG	L	**	**	A	H	L	H	23	1

*1: Japanese model only ** :State of last input

8. Judgment of DSP input signal

It displays the result of detection about the input signal by DSP IC. Refer to the table below.

When the display differs, check the DSP IC and circumference of DSP IC.

Digital Signal Detection		
DIR	STTS2	DSP
00	00	Null
01	01	Dolby Digital
02	02	Reserved
03	03	Pause
04	04	MPEG1 L1
05	05	MPEG1 L23/MPEG2 w/e
06	06	MPEG2 w/e
07	07	MPEGAAC
08	08	MPEG2 L1
09	09	MPEG2 L2/3
0A	0A	Reserved
0B	0B	DTS1(512)
0C	0C	DTS2(1024)
0D	0D	DTS3(2048)
	20	Silent
	21	DTS LD
	22	DTS CD
	23	Linear PCM

9. DSP DECODE

When there is the input signal in DSP IC.

"1" : When decode the signal.

"0": When does not decode the signal.

"0":When there is not the input signal in DSP IC.

When the digital signal is applied in DSP IC, the display is "0".

DSP IC does not operate.

Check the signals to the pins 22, 25, and 26 of DSP IC.

Is there the signal to pin 20 of DIR IC?

NOTE:

1. THE COMPONENTS IDENTIFIED BY MARK "A" ARE CRITICAL FOR SAFETY.

2. RESISTOR VALUE WITH OHM MARKER IS IN OHMS. NO OHM SIGNAL.

3. ALL NEW DIMENSIONS ARE IN MILLIMETERS (IN PARENTHESES).

4. ALL DIMENSIONS ARE EQUIVALENT TO DECIMALS OF MILLIMETERS UNLESS OTHERWISE NOTED.

5. ALL DIMENSIONS ARE EQUIVALENT TO MILLIMETERS UNLESS OTHERWISE NOTED.

6. ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE NOTED.

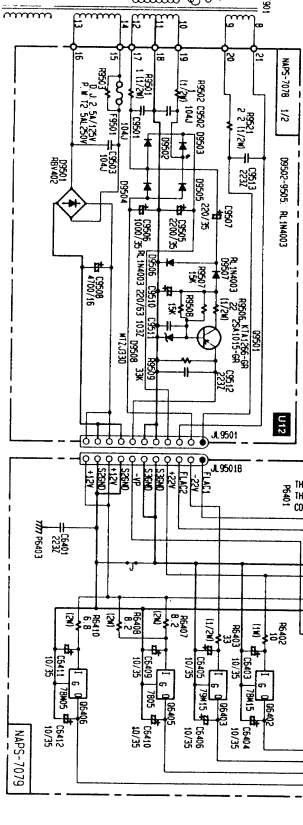

7. ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE NOTED.

8. ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE NOTED.

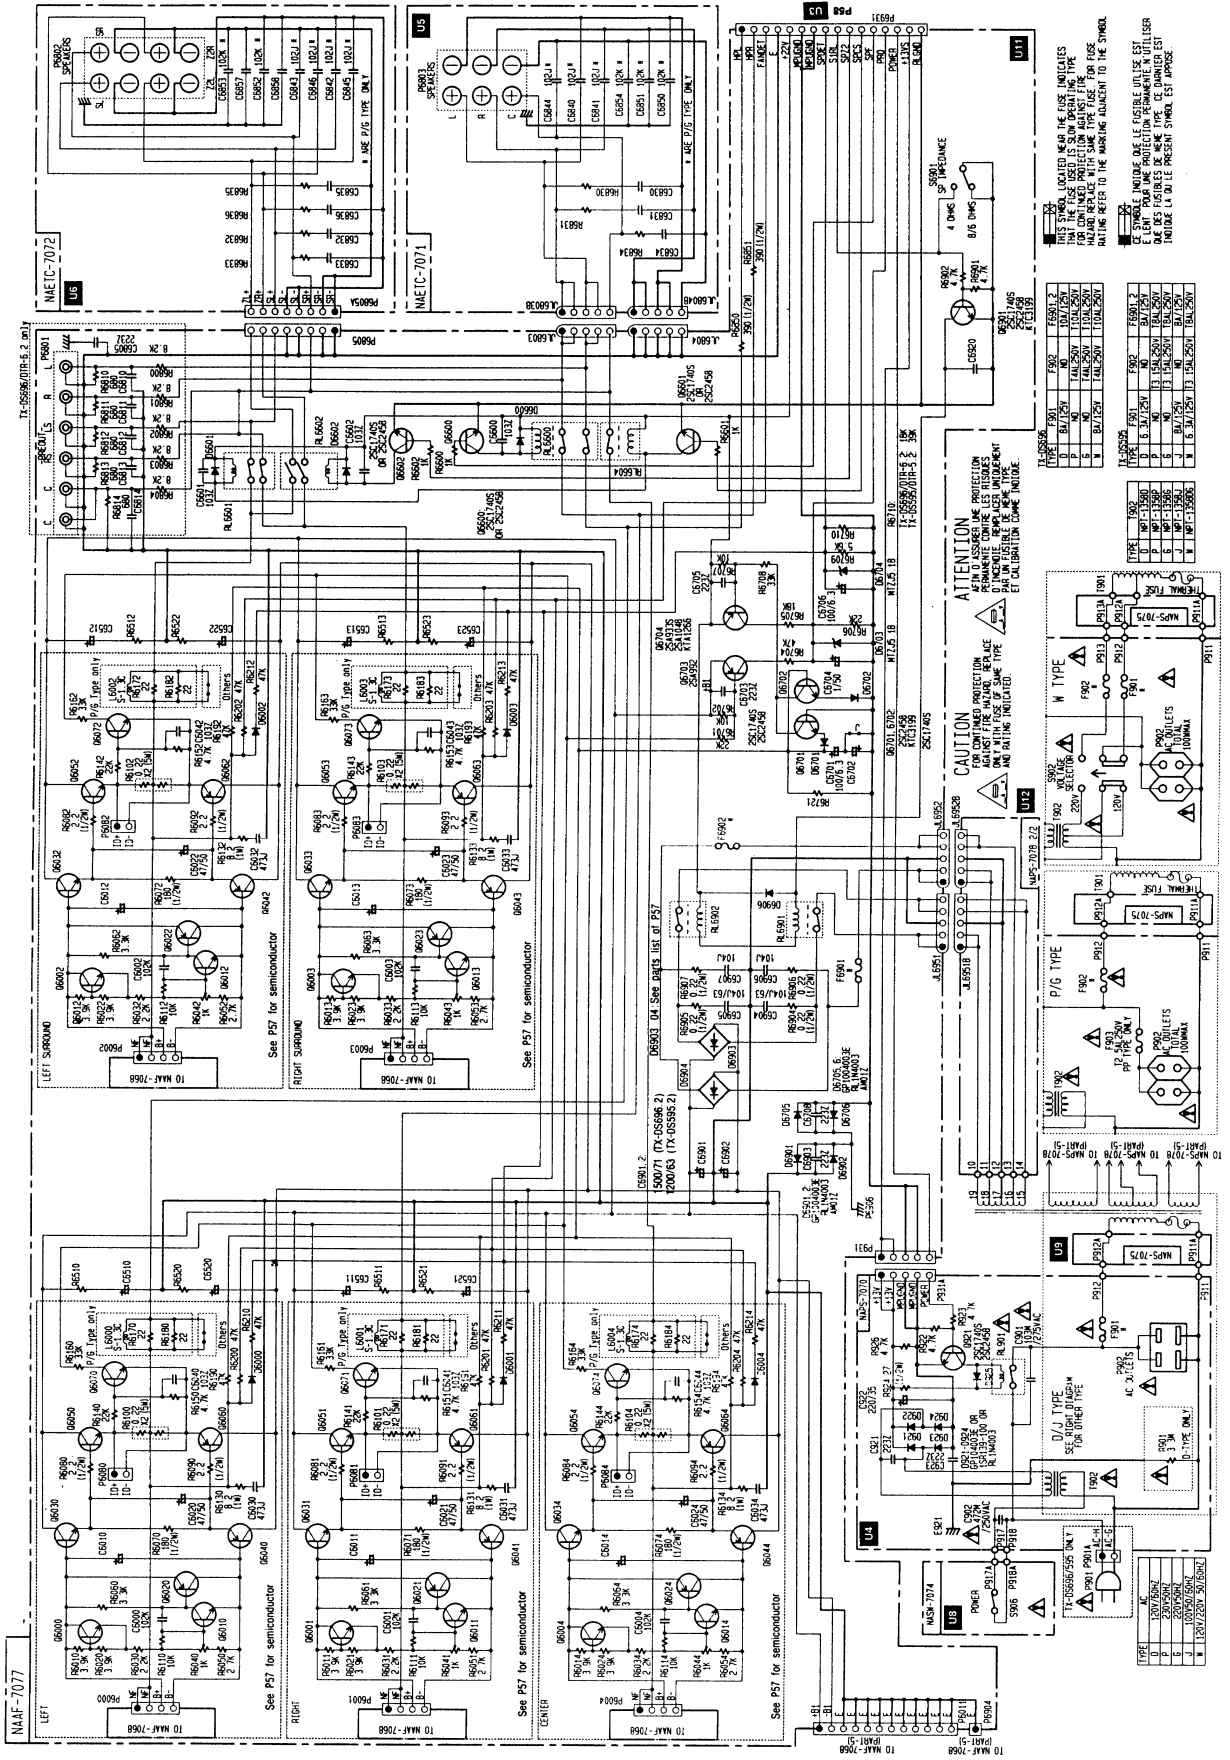

9. ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE NOTED.

ADJUSTMENTS AND CONFIRMATION PROCEDURES

Idling current adjustment

Before idling adjustment, turn the trimming resistors R6040, R6041, R6042, R6043 and R6044 to counter clockwise. Connect the DC voltmeter to sockets P6080, P6081, P6082, P6083 and P6804. After turn POWER to ON, adjust the trimming resistors R6040, R6041, R6042, R6043 and R6044 so that the reading of voltmeter becomes 5.0 mV.

After adjustment, attach the top cover.

Confirm the voltage of points above after five minutes.

When less than 6.0 mV, readjust the resistors above so that the voltage becomes 6.0 mV.

When 6.0 mV to 8.0 mV, you are not necessary to adjust.

When more than 8.0 mV, readjust the resistors above so that the voltage becomes 8.0 mV.

Note: No load and No signal

Confirmation of protection circuit

- 1. Confirmation of operation of speaker relay**
Confirm that the speaker relay turns ON approximate. 5 seconds after the power switch is turned ON. Confirm that the speaker relay turns OFF immediately after the power switch is turned OFF.

2. Confirmation of DC detection circuit

- Connect the shored plug between the both terminals of P5601. Press and hold down DVD button, then press STANDBY button. During "TEST-1" on the FL tube light on, press ZONE 2 (TX-DS696) or SPEAKER A (TX-DS595) button. Apply DC 1.5 to 3V to MULTI CHANNEL INPUT terminal with no load. Confirm that the speaker relay turns OFF.
Apply DC -1.5 to -3V to MULTI CHANNEL INPUT terminal with no load. Confirm that the speaker relay turns OFF.
After the adjustment, disconnect the shorted plug.
Caution: Don't apply DC voltage more than 1 sec..

3. Confirmation of Current detection circuit

- Connect the shored plug between the both terminals of P5601. Press and hold down DVD button, then press STANDBY button. During "TEST-1" on the FL tube light on, press ZONE 2 (TX-DS696) or SPEAKER A (TX-DS595) button. Connect the differentiating circuit and apply the 200Hz square signal to MULTI CHANNEL INPUT terminal. Adjust the attenuator or Volume so that the output level becomes 35V p-p. Confirm that the speaker relay does not turn OFF when a 3.0 ohm load is connected. Confirm that the speaker relay turns OFF when a 1.5 ohm load is connected.

Test Mode

- Turn POWER button on.
- Press and hold down DVD button, then press STANDBY button.
- During "TEST-1" on the FL tube is displayed, press CD button to set the unit to the test mode of FL tube.

Note: VIDEO 1:TEST-1 VIDEO 2:TEST-2 ZONE2/SP A: UP

VIDEO 3:TEST-3 VIDEO 4:TEST-4 REC OUT/SP B: DOWN

Test mode of FL tube

TX-DS696: Press ZONE 2 or REC OUT button to change the test mode of FL tube.

TX-DS595: Press SPEAKER A or SPEAKER B button to change the test mode of FL tube.

Confirmation of voltage sensor

- Set the unit to TEST-3-4.
- Apply the signal 1kHz, -15dBV to the MULTI-CH input. Confirm that the FM STEREO is displayed. Confirm the all channels except SUBWOFFER.
- When connect the resistor 1.2 kohm/1 W between the terminals COM and TH1 of P6401, confirm that the speaker relays of RL6901 and RL6902 turn off.
Note: No input signal.
- When change SPEAKER IMPEDANCE switch to 4 ohm, confirm that the speaker relays of RL6901 and RL6902 turn off.
Note: No input signal.

Confirmation of thermal protect

Set the unit to TEST-1-00 with no input signal.

When connect the resistor 1.2 kohm/1 W between the both terminals of P6401, confirm that all speaker relays turn off.

Use

- 12V Trigger
- Video Mode N: NTSC P: PAL AUTO
- AM band step 9: 9 kHz step 0: 10 kHz step
- Tuner band EU: Europe US: USA SA: Saudi JP: Japan

Press POWER button to finish the test mode of FL tube.
