SERVICING NOTES

NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic breakdown because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body.

During repair, pay attention to electrostatic breakdown and also use the procedure in the printed matter which is included in the repair parts.

The flexible board is easily damaged and should be handled with care.

Laser Diode Properties

- Material: GaAlAs
 - Wavelength: 780 nm
 - Emission Duration: continuous
 - Laser Output Power: less than 44.6 μW*
- * This output is the value measured at a distance of 200mm from the objective lens surface on the Optical Pick-up Block.

CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Flexible Circuit Board Repairing

- Keep the temperature of the soldering iron around 270 °C during repairing.
- Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
- Be careful not to apply force on the conductor when soldering or unsoldering.

Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

Connections of Example

Notes on the control leads

- The AMP/ANT REM lead (blue) supplies +12 V DC when you turn on the unit. When the AMP/ANT REM lead is connected to the power antenna, the antenna will be extended as long as the unit is turned on.
- A power antenna without relay box cannot be used with this unit.

Memory hold connection

When the yellow power input lead is connected, power will always be supplied to the memory circuit even when the ignition key is turned off.

Notes on speaker connection

- Before connecting the speakers, turn the unit off.
- Use speakers with an impedance of 4 to 8 ohms, and with adequate power handling capacities. Otherwise, the speakers may be damaged.
- Do not connect the terminals of the speaker system to the car chassis, and do not connect the terminals of the right speaker with those of the left speaker.
- Do not attempt to connect the speakers in parallel.
- Do not connect any active speakers (with built-in amplifiers) to the speaker terminals of the unit. Doing so may damage the active speakers. Therefore, be sure to connect passive speakers to these terminals.

Remarques sur les câbles de commande

- Le fil d'AMP/ANT REM bleu fournit +12 V DC lorsque l'appareil est mis sous tension.
- Lorsque le fil d'antenne électrique est connecté à l'antenne, l'antenne sera étendue aussi longtemps que l'appareil est mis sous tension.

Connexion pour la mémoire

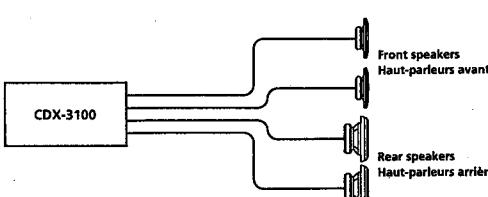

Lorsque le fil d'entrée d'alimentation jaune est connecté, l'alimentation sera toujours fournie au circuit de mémoire même lorsque la clé de contact est sur la position arrêt.

Remarques sur la connexion des haut-parleurs

- Avant de raccorder les haut-parleurs, éteignez l'appareil.
- Utilisez des haut-parleurs avec une impédance de 4 à 8 ohms et avec des capacités de puissance suffisantes. Sinon, les haut-parleurs peuvent être endommagés.
- N'allez pas raccorder les bornes du système de haut-parleurs au châssis de la voiture, et n'allez pas raccorder les bornes du haut-parleur droit avec celles du haut-parleur gauche.
- N'essayez pas de connecter les haut-parleurs en parallèle.
- N'allez pas connecter de haut-parleurs actifs (avec amplificateurs intégrés) aux bornes de haut-parleur de l'appareil. Faire cela peut endommager les haut-parleurs actifs. Par conséquent, assurez-vous de connecter des haut-parleurs passifs à ces bornes.

CD SECTION

Note:

1. CD Block basically constructed to operate without adjustment. Therefore, check each item in order given.
2. Use YEDS-18 disc (3-702-101-01) unless otherwise indicated.
3. Use the oscilloscope with more than $10 M\Omega$ impedance.
4. Clean an objective lens by an applicator with neutral detergent when the signal level is low than specified value with the following checks.

Focus Bias Adjustment

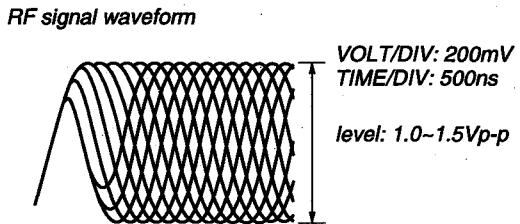

Setting: This adjustment is performed with the set placed horizontally.

Procedure:

1. Connect an oscilloscope between TP (RF) and TP (RF GND) on the SERVO board.
2. Connect the power supply.
3. Push the RESET button (S700) on the panel (sub).
4. Insert the disc (YEDS-18) and playback.
5. Adjust RV1 so that the oscilloscope waveform is clear and check RF signal level is correct or not.

Note: Clear RF signal waveform means that the sharp “◇” can be clearly distinguished at the center of the waveform.

- When observing the eye pattern, set the oscilloscope to AC range and raise the vertical sensitivity so that it may be easily seen.

Focus Gain Adjustment (Coarse adjustment)

This adjustment is not required unless the following parts are replaced:

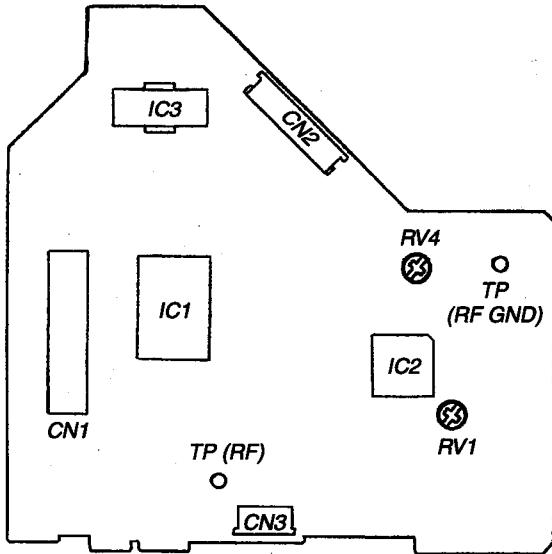

- Optical block
- RV4

Adjustment:

1. Set RV4 to the standard position. (mechanical center)
2. Check whether operation noise (while noise type) caused by the double-axis device (lens section of the optical block) is abnormally loud.
If the operation noise is too loud, turn RV4 slightly counter-clockwise.
- If the gain is too low:
Focus does not function and no music is selected.
- If the gain is too high:
Noise caused by scratches and dust is heard and the operation becomes unstable.

ELECTRICAL PARTS LIST

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
All resistors are in ohms.
METAL: Metal-film resistor.
METAL OXIDE: Metal oxide-film resistor.
F: nonflammable

● Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

● SEMICONDUCTORS

In each case, u:μ, for example:

uA .. : μA .. uPA .. : μPA ..

uPB .. : μPB .. uPC .. : μPC .. uPD .. : μPD ..

● CAPACITORS

uF: μF

● COILS

uH: μH

When indicating parts by reference number, please include the board.

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité.

Ne les remplacer que par une pièce portant le numéro spécifié.
