

Electronics Software Links

Updated November 17, 2023

Mostly free software or at least the demo version is useful enough to do real work.

Please note the writer has not tested all of this software and offers no warranty on any of it for suitability, cost or being free of any malware, etc. One must always have up to date anti-virus software on their computer before downloading from the internet and that includes from this site.

All downloads are at the risk of the person downloading anything from these sites.

Report broken links, bad programs or other issues as well as suggestions of other links to “chuckles951 @ yahoo.com”. Delete the quotes and anti spam spaces.
