

Fart Strenght Meter!

This gadget is a great thing for the lad's and works well with the tone of a good fart! If anybody gets to the top light then check your pant's as you have properly **Drawed Mud!** You can have a good laugh with the lads at work by placing bet's, May the best fart win!

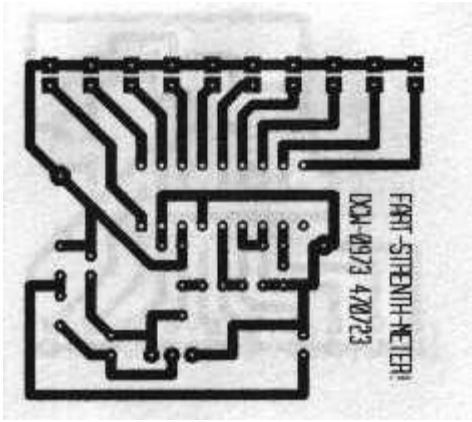

This gadget work's on a 9v PP3 batt. Attach the mic to a long stick so you dont get to close to the firing pad. Then use a long bit of wire to connect it to the main PCB, you can get small box's to fit it all in so then you have to drill ten hole's for the light's and put a switch in it and then your ready! May the best man(fart) Win!.

Diagram..

You should get no problem with getting hold of the parts for this one. You can use differant colour LED's for the display but use red for the danger level!

The PCB..

You should have some good fun with this one, I did and sold a few as well. Any problems or want a ready made PCB then E Mail me deano@deanwhite.freeseve.co.uk
