Renew That Cabinet!

BY HARRY LEEPER

WHILE your customer is unable in most cases to see replacements made in repair jobs, he or she will be quick to note improvements made on the radio cabinet. Such improvement tends to instill a pride of ownership in the customer as well as confidence in your ability and in the repairs hidden under the chassis. Appearance of the radio cabinet usually may be brightened and scratches stained by using a few inexpensive tools as illustrated below.

Photo 1. Dust from the speaker grille cloth and around the edges of the cabinet wood is quickly removed with a small brush picked up at the dime store.

Photo 2. Cleaning of glass dial faces is speeded up and done efficiently with liquid window cleaner used in a sprayer. The inside of the glass also should be cleaned while the chassis is out of the cabinet.

Photo 3. Stains and marks from various substances contacting the cabinet can usually be removed with light brushings of carbon tetrachloride.

Photo 4. Shallow scratches are easily treated with a *Scratch Stick* made by General Cement Co. The bare spot is first stained with the crayon end of the stick.

Photo 5. The stick is reversed and the oiled brush end is used. This works well with walnut and mahogany finishes. However, deep cuts may require application of regular liquid stain with a small brush.

Photo 6. The last step is the use of a good furniture polish over all the cabinet. A cloth should be carried in the tool kit and final polish given the cabinet after it is replaced in the customer's home.

NAZIS USED WAR TELE

Television was used by the German military in experiments with guided missiles during the last war according to a report on TV progress by the Office of Technical Services, Department of Commerce. Civil television remained at a standstill during the war though programs were supplied to military hospitals until the transmitter was bombed.

RADIO ITEMS INDEXED

The more important articles in RADIO-CRAFT are indexed in a little publication published by Richard H. Dorf, 255 West 84th St., New York, N. Y. This amateur index service is a monthly mimeographed booklet which lists the most interesting articles in 14 radio and electronics magazines. Cost is \$1.00 per year.
