

Out of Tune

OUT OF TUNE

In "Audio Power Meter," October 1979, the resistor connected to pin 5 of *IC2B* should be *R27* and there should be no connection between its other end (point L) and *R26*. The pc pattern is correct. The meter, *M1*, should be 0–1 mA as in the Parts List, not 0–1 μ A. Also, in the Parts List, *S3* should be listed as a spdt not spst switch. Under Calibration, in the text on page 67, at the top of the third column, after applying the 6.0-V signal to *R3* and *R4*, add the instruction to adjust *R8* to obtain a null on the meter. Then remove the signal from *R3* and *R4* and remove power.
